The EuroChemLink formula

EuroChemLink is a dedicated consultancy offering a complete range of regulatory affairs and registration support with many years of experience concerning biocidal products.

We aim to offer our clients high quality, individually designed registration packages and regulatory services at a cost effective price.

Let your business flourish – explore EuroChemLink's services and take advantage of our:

- Broad range of regulatory and registration services which can be tailor-made to match your commercial objectives;
- Comprehensive network of independent scientists for dietary, toxicological, ecotoxicological and environmental fate risk assessments and advice;
- Extensive experience in the management of industry task forces;
- People on the ground within the European member states;
- Multilingual capabilities;
- Extensive range of personal contacts at all government levels;
- Highly cost effective price. Our flexible fee structure is designed to give you the benefit of our services on a daily, monthly or annual basis;
- Each member of our professional staff has more than 20 years of industrial experience.

Areas of operation

EuroChemLink specialises in the provision of regulatory services at both the European Union (EU) and member state level.

Our range of expertise covers:

- The preparation, submission and tracking of complete product registration dossiers for approval under Directive 98/8/EC;
- A complete range of services dedicated to the setting up of and support to industry task forces;
- Internal capabilities for preparing all dossiers in IUCLID;
- Complete project management;
- A wealth of experience gained in preparing dossiers for the first review under the Biocidal Products Directive;
- Many years of experience in biocidal product registrations at the member state level;
- Evaluation of product dossiers to ensure compliance with the Biocidal Products Directive;
- Through the BioChemAlliance, the design, placement and monitoring of all studies required on the active substance and biocidal product;
- Assessment of products under the Dangerous Preparations Directive.
